

Bell Work

1/23/2015

Solve the following:

$$-2 + +8 = 6$$

$$-8 \div 2 = -4$$

$$-2 \cdot -8 = 16$$

$$(-2)(8) - (2)(8) =$$

$$(-2)(8)(-2) = 32$$

$$-16 - 16 = \textcircled{-32}$$

1. Collect Bell Work
2. Collect yesterday's work

**Today:**

- Individual Practice
- You will use your models
- On your blank sheet of paper:
  - > Draw only your solution and write out all the math.
- Check your answer in another color.

East Island | West Island

$$3x - 5 = 10$$
