## **Depreciation Investigation**

Name \_\_\_\_\_

The price for the 2010 Ford Truck you would like to buy is \$17,250. Suppose the car depreciates 12% each year. The table below models the relationship between the years the cars has depreciated and the value of the car.

Label your x and y-axis and choose an appropriate scale.

| у |  |  |  |  |  |  |  |  |  |
|---|--|--|--|--|--|--|--|--|--|
|   |  |  |  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |  |  |

| Years<br>Old | Value   |  |  |  |
|--------------|---------|--|--|--|
| 0            | \$17250 |  |  |  |
| 2            | \$13358 |  |  |  |
| 4            | \$10345 |  |  |  |
| 6            | \$8011  |  |  |  |
| 8            | \$6203  |  |  |  |
| 10           | \$4804  |  |  |  |
| 12           | \$3720  |  |  |  |
| 14           | \$2881  |  |  |  |
| 16           | \$2231  |  |  |  |

## Write your answers in complete sentence!!

1. As the number of years the car has depreciated increases what happens to the value of the car?

х

2. How much did the value of the car decrease from year 0 to year 2? How much did the car decrease from year 2 to year 4? From year 4 to year 6?

## **Depreciation Investigation**

- 3. What kind of rate is the car depreciating at?
- 4. What type of function would best model the depreciation of a vehicle? Linear, quadratic, or exponential? Explain your reasoning.
- 5. The **decay rate** is the percent at which the vehicle is decreasing by each year. What is the decay rate for the 2010 Ford Truck?
- 6. The growth factor is the percent left after you subtract the decay rate from 100%. What is the growth factor?
- 7. You can write an equation for the value of the car after x years  $V(x) = a(b)^x$  where, *a* is the starting value and *b* is the growth factor. What is the equation for V(x)?
  - a.) How much is the car worth in 20 years? 30 years? 50 years? In the year 2110?

b.) Will the car ever reach a value of \$0? Explain how this is shown by looking at the graph, table, in real-life.
