

Expand and re-write using only one exponent:

$$7^4 \cdot 7^2 =$$

$$3^3 \cdot 3^5 =$$

Examine the exponents. **Describe** a shortcut to simplifying the expressions above?

Property 1: $a^r \cdot a^s =$

Practice: $5^3 \cdot 5^6 =$

$x^7 \cdot x^8 =$

$x^4y \cdot x^{-3}y^5 =$

Expand and re-write using only one exponent:

$$(5^3)^2 =$$

$$(3^4)^2 =$$

Examine the exponents. **Describe** a shortcut to simplifying the expressions above?

Property 2: $(a^r)^s =$

Practice:

$(4^5)^6 =$

$(x^{-3})^{-5} =$

Expand and re-write using exponent:

$$(2x)^3 =$$

$$(3xy)^3 =$$

Examine the exponents. **Describe** a shortcut to simplifying the expressions above?

Property 3: $(ab)^r =$

Practice: $(3x)^3 =$

$(4x^4)^3 =$

$(2y)^3(y^2) =$

Expand and re-write using only one exponent:

$$\frac{2^7}{2^4} =$$

$$\frac{x^5}{x^3} =$$

$$\frac{y^{14}}{y^6} =$$

Examine the exponents and discuss a shortcut to simplifying the expressions above:

Property 4: $\frac{a^r}{a^s} =$

Practice: $\frac{2^{15}}{2^2} =$

$$\frac{x^6}{x^9} =$$

$$\frac{x^7y^3}{x^6y^{10}} =$$

$$\frac{y^3y^6}{y^2} =$$

Expand and re-write using exponent:

$$\left(\frac{3}{2}\right)^3 =$$

$$\left(\frac{2}{5}\right)^4 =$$

Examine the exponents and discuss a shortcut to simplifying the expressions above:

Property 5: $\left(\frac{a}{b}\right)^r =$

Practice: $\left(\frac{x}{2}\right)^3 =$

$$\left(\frac{x^2y}{3}\right)^4 =$$

$$\left(\frac{5}{y}\right)^2 =$$

Write each expression as a decimal and then convert to a fraction:

$$2^{-1} =$$

$$2^{-2} =$$

$$2^{-3} =$$

$$2^{-4} =$$

Examine the exponents and end result. Discuss a shortcut to simplifying the expressions above:

Definition: $a^{-r} =$

Practice:

$$2^{-3} =$$

$$x^{-2} =$$

$$y^3x^{-6}$$

$$2x^3x^{-7} =$$

$$3y^2x^5y^{-4} =$$

Exponent Properties: The Zero Exponent Rule

Quotient	Use the quotient rule to write in the form a^b	Look at the original quotient, what is it as just a number?
$\frac{2^3}{2^3}$		
$\frac{5^7}{5^7}$		
$\frac{x^{20}}{x^{20}}$		

What do you think anything to the zero power should equal?

Definition: $a^0 =$

Geometry Fact

Volume of a Rectangular solid:

Area of a Square

$$A = s^2$$

Volume of a Cube

$$V = s^3$$

Volume of a rectangular Box

$$V = l \cdot w \cdot h$$
